

ENVIROPRO

High Performance Waterbornes of Distinction for
Timber, Cork and Parquetry

PRODUCT DATA SHEET

EnviroCare

Commercial Non-Toxic Disinfectant, Cleaner, Deodorant, Buff Agent

DESCRIPTION:

EnviroCare is a T.G.A. approved quaternary ammonium based commercial cleaner disinfectant with multi functional properties of:

- Powerful yet mild non-toxic cleaner
- Germicidal disinfectant
- Detergent
- Deodorant
- Film forming product to enable friction buffing of a surface

Envirocare is particularly suitable for critical hospital and school areas as well as all other timber, vinyl, seamless and hard surfaces.

FEATURES:

- Recommended for use where positive and negative bacteria control is imperative.
- Contains a biodegradable non-ionic detergent which makes it an excellent cleanser as well as being a disinfectant and a deodorant.
- Designed for use on floors that must be bacteria free such as hospitals, child care centres, schools, gymnasiums, etc
- T.G.A. approved
- Can be used on doors, walls, bench tops, sinks, etc as well as floors for cleaning and disinfecting.
- Suitable for critical hospital areas such as operating rooms, intensive care areas, urine bottles, shower rooms and toilets.
- Can be used on Vinyl and seamless flooring floor surfaces for germ control and cleaning
- **Contains natural lemon grass oil**, which leaves a film on the floor to enable high speed buffing over metallised polishes such as **Enviropro Renew**.

DIRECTIONS FOR USE:

Critical Areas For Germ Control

For use in critical hospital environments including toilet floors and walls, bedpans, urine containers, etc. Use **Envirocare** at a rate of 1:40 or 125 ml per 5 litres of hot or cold water.

Non-Critical Areas

Developed and produced in Australia from the latest in World Wide Technology.
Australian Specialty Waterborne Coatings Pty Ltd ACN 070 919 854

Windows, walls, floors, benches, etc. use **EnviroCare** at a rate of 1:100 i.e. 50 ml per 5 litres of water.

Daily Maintenance for a Highly Polished Appearance on Renew Metallised Polish Floors

- Damp floors daily with a solution of **EnviroCare** at a mix ratio of 50 ml per 5 L in general areas. Allow to dry and buff lightly using a red or other suitable buff pad.
- Bad scuff, furniture drag marks, and damage marks should be removed by rubbing with fine grade 0 steel wool pads dipped in **Renew**.
- Alternatively floors may be spray buffed with **EnviroCare** at a 10% in water mixture.
- Spray **10% EnviroCare Spray & Buff** solution finely onto floor using an atomiser and buff with machine immediately.

A blue pad is recommended where some cutting into the **Renew** surface is desired to remove heavy cuts or scuff marks, otherwise use a red pad.

Alternatively the floor can be damp mopped with **EnviroCare** and not buffed each application. It may be a once per week buffing will provide for the high gloss finish desired

CLEAN-UP

Simple water clean up

PROPERTIES AND DATA

Ingredients	-	Quaternary based germicidal disinfectant containing natural lemon oil
Colour	-	Yellow clear liquid
Odour	-	Lemon
Density	-	1.02 S.G.
Application	-	Applicator, mop, squeegee, atomiser bottle
Flammability	-	non flammable waterbased
Stability	-	24 months in sealed containers
Foaming	-	Slight
Safety	-	Non hazardous per Worksafe Australia.
Packaging	-	5 Litre recyclable plastic container 20 Litre plastic container with tap.
